

NovusMED CREDENTIAL MANAGEMENT

MANAGE CREDENTIALS AND CERTIFICATION DATA

Credential Management ensures only active and approved drivers and vehicles provide NEMT trips. This is key for accurate reimbursements and clean audits for transportation providers and brokers. Additionally, brokers need to ensure that only approved providers may perform and bill for NEMT trips.

Credential Management capabilities allow efficient management of all necessary certification data, validating providers and their drivers and vehicles. Providers can upload supporting documentation, while brokers and providers can create reports to track expiration dates of licenses, vehicle inspections, insurance, training, and other requirements specified by the organization, funders, or state and federal regulators.

KEY BENEFITS INCLUDE

- Accurate compliance with funders contracts, ensuring only active and approved providers, drivers, and vehicles provide NEMT trips
- Expedite reimbursements and ensure audit compliance through comprehensive and verifiable data collection
- Improving billing efficiencies by reducing the number of denied trips
- Flexibility to allow for the variances in credentialing requirements across different states
- Manage all credential types (expiring license/insurance, drug test cert, etc.) from one central place at the broker and provider level

Credential Type
Annual Audit
Auto Liability Insurance
Business License
City/State Permit
Defensive Driver Training
DMV Check
Driver Background Check
Driver License
General Liability Insurance
Inspection
Vehicle Registration
Passenger Assistance Training
Workers Comp Insurance

Set up specific credential categories for drivers, vehicles, and providers

FEATURES

- Easy to use credential dashboard
- Store driver and vehicle credentials by type, status, and details
- Mark a driver or vehicle as active or inactive
- Receive notifications of upcoming credential expirations
- Automatically update status upon credential expiration
- Providers can login, review, and update credential statuses, as well as upload and attach relevant documents for each credential
